PROFESSIONAL SUMMARY

Unity Developer with 3+ years of commercial experience in C# across mobile games, VR/XR and interactive applications. Took a large-scale Unity prototype from architecture and technology-stack selection to MVP, applying OOP, SOLID, Clean Architecture and Zenject dependency injection to build modular, scalable systems. Delivered two mid-core projects from scratch through release and independently delivered two major app updates. Experienced with MVP/MVVM, asynchronous C# (async/await, UniTask), REST API and third-party SDK integration (Firebase Analytics, AdMob, Unity Ads), code reviews, profiling and performance optimization.

TECHNICAL SKILLS

Languages & Engine: C#, Unity (Unity 6), object-oriented programming (OOP), asynchronous programming (async/await, UniTask), 2D/3D

Software Architecture: SOLID, Clean Architecture, MVP/MVVM, Zenject/Extenject (Dependency Injection), design patterns (Dependency Injection, State Machine), interfaces, ScriptableObjects, modular design

Performance & Quality: performance optimization, profiling (Unity Profiler), code reviews, debugging, refactoring, Unity Test Framework, EditMode/PlayMode tests

SDKs & Integrations: REST APIs, client-server/backend services integration, Firebase Analytics, AppMetrica, GameAnalytics, AppsFlyer, Adjust, Tenjin, AdMob, Unity Ads, AppLovin

Platforms & Rendering: Android, iOS, VR/XR, URP, Input System

Gameplay & UI: gameplay systems, Unity Physics, animation, Spine, DOTween, Unity UI

Multiplayer & Networking (personal project): Netcode for GameObjects, Unity Lobby/Relay, RPCs, state synchronization, prediction/reconciliation

Tools: Git, JetBrains Rider

PROFESSIONAL EXPERIENCE

Unity Developer, Mirko Solutions — Apr 2026 – Present

Remote | Full-time Apr – Sep 2026, part-time since Sep 2026

- Develop gameplay, UI and client-server integrations in Unity and C# for outsourced client applications, including Tile Trap and Space Snap Clicker.
- Build VR interactions for an NDA-protected VR project.
- Debug and optimize features across client projects.

Unity Developer, Wayheart Entertainment — Aug 2026 – Oct 2026

Remote | Part-time

- Independently delivered two major updates for The Artman App using Unity and C#, owning development, debugging and optimization through the app's official release.

Unity Developer, CREATY — May 2024 – Apr 2026

Lutsk, Ukraine

- Developed two mid-core Unity projects from scratch through release.
- Integrated client-server/backend services and third-party SDKs (AdMob, Unity Ads, Firebase Analytics) and maintained the SDK integrations.
- Prepared Android and iOS builds and debugged production issues.
- Implemented gameplay and polished in-game UI in collaboration with game designers, analysts and UI/UX designers.

Unity Developer, Bugiko **Nov 2023 – Apr 2024**

Remote

- Took a large-scale Unity prototype from architecture and technology-stack selection to MVP.
- Applied OOP, SOLID, Clean Architecture and Zenject dependency injection to create modular systems focused on performance and scalability.

Unity Developer, Freelance **Apr 2023 – Oct 2023**

Remote

- Built casual mobile games and interactive Unity apps, covering gameplay, UI, animation and audio; clarified requirements directly with clients.
- Optimized and tested Android/iOS builds.

SELECTED PROJECTS

Scrap Orbit (Personal Project) **parazzzi.itch.io/scrap-orbit**

Unity 6, C#, Netcode for GameObjects, Unity Lobby/Relay, URP, Input System, Unity Test Framework

- Built a first-person game for solo and online co-op with procedural stations, dismantling, physics-based cargo, oxygen management and fire/electrical hazards.
- Structured shared, testable gameplay rules for solo and co-op using explicit state machines and ScriptableObject configuration.
- Implemented host-authoritative networking with Netcode for GameObjects and Unity Lobby/Relay, using RPCs, state synchronization and cargo prediction/reconciliation.
- Covered gameplay logic with EditMode/PlayMode tests and automated co-op scenarios; used URP for rendering and custom effects; built a Blender Python-to-Unity asset pipeline.

EDUCATION

Master's Degree in Civil Engineering **Sep 2024 – Dec 2025**

SNU named after V. Dal, Kyiv

Bachelor's Degree in Civil Engineering **Sep 2021 – May 2024**

SNU named after V. Dal, Kyiv

LANGUAGES

Ukrainian, Russian, English (A2-B1)
